

ADD IPEV CERTIFICAT IN FIREFOX 3.5

- On the security alert, clic on the link **"I understand the risks"**

This screenshot shows a Firefox security alert titled "This Connection is Untrusted". It includes a warning icon, a "Get me out of here!" button, and two expandable sections: "Technical Details" and "I Understand the Risks". A red arrow points to the "I Understand the Risks" section.

This Connection is Untrusted

You have asked Firefox to connect securely to **www.ipev.fr**, but we can't confirm that your connection is secure.

Normally, when you try to connect securely, sites will present trusted identification to prove that you are going to the right place. However, this site's identity can't be verified.

What Should I Do?

If you usually connect to this site without problems, this error could mean that someone is trying to impersonate the site, and you shouldn't continue.

[Get me out of here!](#)

- ▶ **Technical Details**
- ▶ **I Understand the Risks**

- And clic the **"Add exception..."** button

This screenshot shows the same Firefox security alert as above, but with the "I Understand the Risks" section expanded. It now includes a warning icon, a "Get me out of here!" button, and an "Add Exception..." button. A red arrow points to the "Add Exception..." button.

This Connection is Untrusted

You have asked Firefox to connect securely to **www.ipev.fr**, but we can't confirm that your connection is secure.

Normally, when you try to connect securely, sites will present trusted identification to prove that you are going to the right place. However, this site's identity can't be verified.

What Should I Do?

If you usually connect to this site without problems, this error could mean that someone is trying to impersonate the site, and you shouldn't continue.

[Get me out of here!](#)

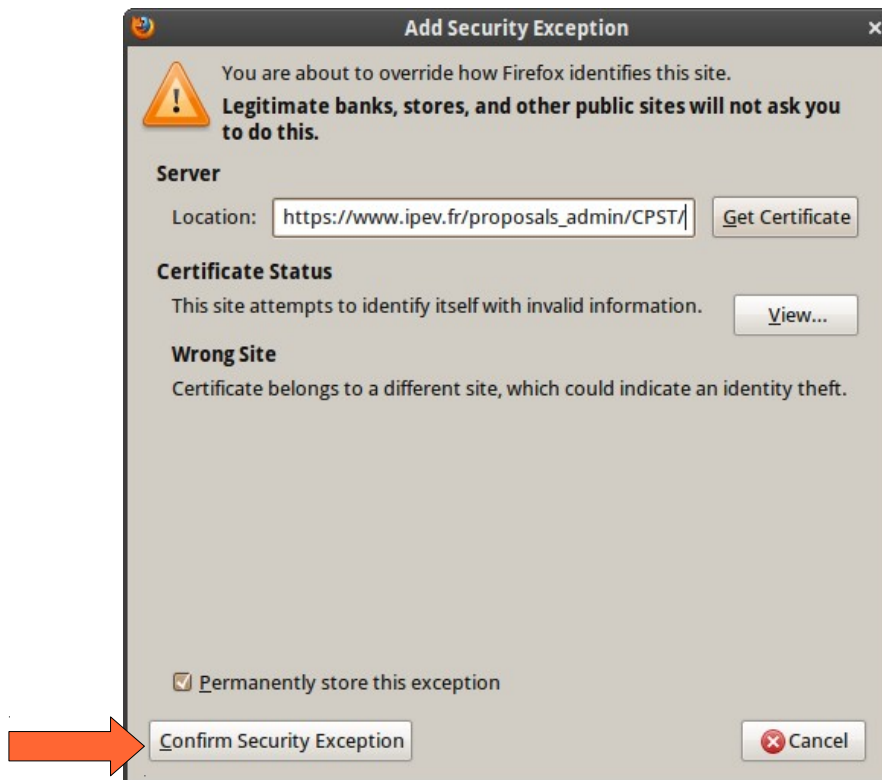

- ▶ **Technical Details**
- ▼ **I Understand the Risks**

If you understand what's going on, you can tell Firefox to start trusting this site's identification. **Even if you trust the site, this error could mean that someone is tampering with your connection.**

Don't add an exception unless you know there's a good reason why this site doesn't use trusted identification.

[Add Exception...](#)

- and clic the **"Confirm security exception"** button

- **And finally enter your authentication**
